Farms shape our health through nutrients, soil, water, air, climate, economy and community.

Come join us to explore common ground and to find solutions that nourish soil and people.

**Who should attend?**

Students and professionals in health, agriculture and ecology.

- Educators
- Innovators
- Policy makers
- Farmers
- Clinicians
- Nutritionists
- Researchers
- Economists and funders.

**TOTAL HEALTH from the SOIL UP**

**BRIDGING THE SILOS OF HEALTH AND AGRICULTURE**

**THURSDAY, AUGUST 9, 2018 9AM-5PM**

**GREAT HALL, BANCROFT HOTEL, BERKELEY, CA**

Speakers will address these important questions, and many more...

- How can we get more fruits and vegetables onto plates?
- Do food safety policies really keep us safe?
- Is tilling a health concern?
- Is farmworker health a window into farm health?
- What type of farm produces the most nutritious food?
- What are the links between farm animals, healthy soil, and healthy people?
- Why is a carrot more expensive than a bag of Flamin’ Hot Cheetos?
- What does the soil microbiome have to do with the human microbiome?
